

# BLACKROD PRIMARY SCHOOL

## Autumn Project Reflections

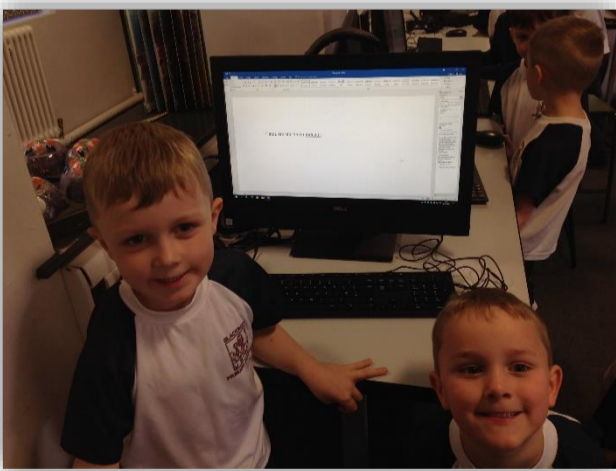

### Computing – Digital Literacy

We learnt about how to use technology safely and respectfully, keeping personal information private, identifying where to go for help and support when they have concerns about content or contact on the internet or other online technologies.

We learned how to create and display information in different formats, including Microsoft Word.

When the information was created, the children discovered how to edit their work, including: adding borders, underlining words, inserting images, making words bold and then finally saving it in the correct place.

We loved developing our skills in computing!

#### Key Vocabulary

Edit -correcting, condensing, or modifying work.

Tabs - A way to have more than one page/screen open at a time.

Software - Programs and applications that do certain tasks such as writing letters, sorting files, drawing pictures, and playing games.
