

BLACKROD PRIMARY SCHOOL

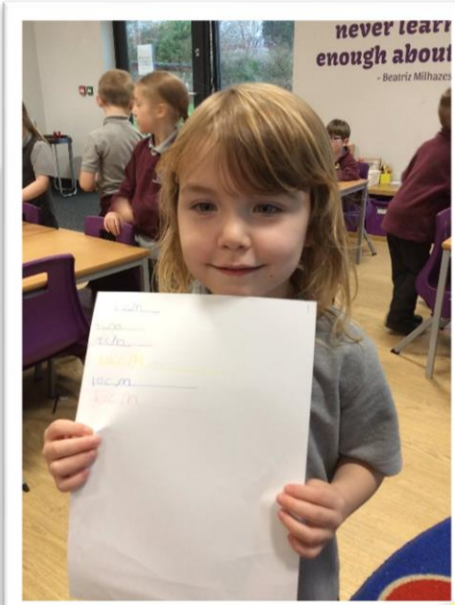

Project Reflection – Autumn 2

Design Technology: Mastering Skills – Measuring and Cutting

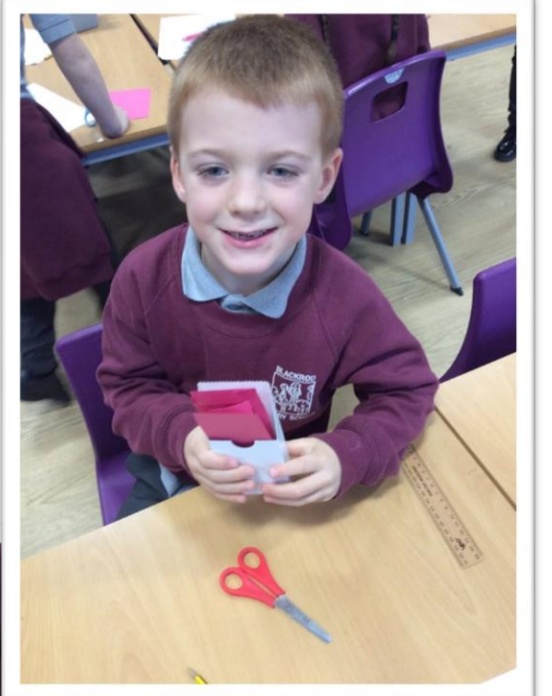

In Autumn 1, the children loved creating their very own marble runs. This half term we mastered some of the skills we needed to make the marble runs.

First, we mastered the skill of measuring using our rulers. We learnt that when we measure we always start at 0cm.

We then practised our cutting skills ensuring we were holding our scissors correctly and cutting the lines carefully.

Finally to ensure we really had mastered the techniques of measuring and cutting we had a mission to measure and cut card to fit in a box. We were brilliant at it and knew that we had mastered our skills.
